

CONVEYOR ROLLERS

POWER-DRIVEN CONVEYOR ROLLERS

Area of use:

Implementation in roller conveyors

Benefits:

Robust model, drive element welded or pressed

Product range:

3760, 4830, 4840, 4550, 4900, 5006, 5020, 5070, 5103, 5104, 5105, 5113, 5115, 5123, 5125

GRAVITY ROLLERS

Area of use:

Gravity conveyor rollers for application with manual drive or by gravity

Benefits:

For light and heavy piece goods

Product range:

500, 1000, 2000, 2500, 2600, 3000, 3500, 3700, 4100

TAPERED ROLLERS

Area of use:

For the safe transport of piece goods in curves

Benefits:

Low noise level, antistatic, stainless steel model possible

Product range:

6000, 6020, 6040, 6560

DRIVE ROLLERS

Area of use:

Developed for transport of small containers and boxes, freight up to 100 kg per drive roller

Benefits:

Gearless and sensorless, long lasting, efficient

KRAUS, your producer of conveyor rollers

from lot size 1 available!

SPECIAL SERVICES

Polishing and galvanizing

Improve the finish quality, as well as corrosion protection

Chrome

Prevents idler roller from marking the wood. For use in the saw and planing mills

Phosphating

Serves as corrosion protection and improves the sliding properties of the axel material

PU-Coating

Various thicknesses and surface hardening protect the material and help to reduce noise

Powder Coating

Different features can be achieved depending on the coating method

Inductive Hardened Sprocket

By hardening the tooth flanks there is a higher resistance to wearing

Knurled Surface

A better exaggregation is achieved by Knurling

Pipe Crowning

The crowning prevents the material from running off on the drive side and output side

Special Sprockets

We produce special sprockets per customer request

Special Flanged Pulleys

We produce special flanged pulleys per customer request
