

Laminar Flow Box

Increase the cleanliness of your workspace
and the efficiency of your research

Reduce Complexity

Every component in your system has a significant impact on the performance and the results; this holds true even for air.

Save Costs

Thanks to long-lasting and low-maintenance HEPA 14 filters with an efficiency of more than 99.995%.

Protect Yourself

Against pollution and airborne pathogens including viruses, bacteria, and pollen.

Save Time

It can be time consuming to determine a malfunctioning component – long lead times further delay your project.

**Contact us for your
customized solution!**

**Table Top
Device**

Quick installation at your
workspace.

HEPA 14 Filter

Removes > 99,995% of
all particles @ 0,3 µm.

**Laminar
Flow**

For no disturbance
at your setup.

Industry

For manufacturing
and packaging of
components.

**No Onboarding
Required**

Thanks to a minimalistic
and practical design.

Laboratories

For analysis in clean-
room conditions.

Inner Dimensions	1.150 mm x 550 mm x 850 mm
External Dimensions	1.210 mm x 610 mm x 1.200 mm
Volume Flow	600m ³ /h, 800m ³ /h, 1.000 m ³ /h
Filter	HEPA 14, Prefilter G1
Noise Level	45 – 59 dB(A)
Power	65 W, 95 W, 135 W
Side Walls	5 mm Plexiglass
Main Filter Change	2 years
