The unique design of the grinder has been developed by Melnir with accuracy, taking into account all weakness of the most of existing models.

Reliability of Milner's grinder will allow your brand to position itself as a high-quality product.

The design of the grinder is patented.

Classic grinder

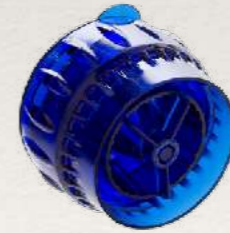

- **Universality.** The grinder allows to capture particles up to 7 mm.
- **Durable and solid material** allows to fill in with blends of herbs, different kind peppers as well as granulated salt.
- Container **made of glass**, volume - 115 ml
- **Screw grinder cap** does not require any extra equipment, and possibility to refill container additionally stimulates end user.
- There's great opportunity for implementation of **any ideas of brand recognition**. Placement of the label is 65 x 130 mm.
- There's option to have **individual color** that match your brand identity.
- Traditional, **easy recognizable shape** of mill for spices. The shape, size and volume as much as possible reflect the prevailing image of a mill for spices.

Classic

- **Optimum grinding fraction** - Grind size is fully tested and adapted to achieve maximum results in flavor and aroma during cooking or pickling.
- **Full and equable grinding** allows to keep blend during all time of use: large particles are not dropped, ensuring steady component grinding as well in the beginning as at the end of the grinding process.
- **Easy rotation and convenient fix** - A little effort is required to grind a hard particles (sea salt, cinnamon sticks, pepper), the elongate shape of the container, as well as ribbed rotation ring reliably fix the grinder in hands.

Disposable grinder

- Fine ground
- Extremely good for any kind of spices
- Disposable application
- There's great opportunity to implement **any of ideas of your brand recognition.**
- Label placement field is 40 x 120 mm
- Container **made of glass**, volume - 80 ml
- There's option to have **individual color** to match your brand identity.
